

한 번에 끝내는 블록체인 개발 A to Z

Chapter 5

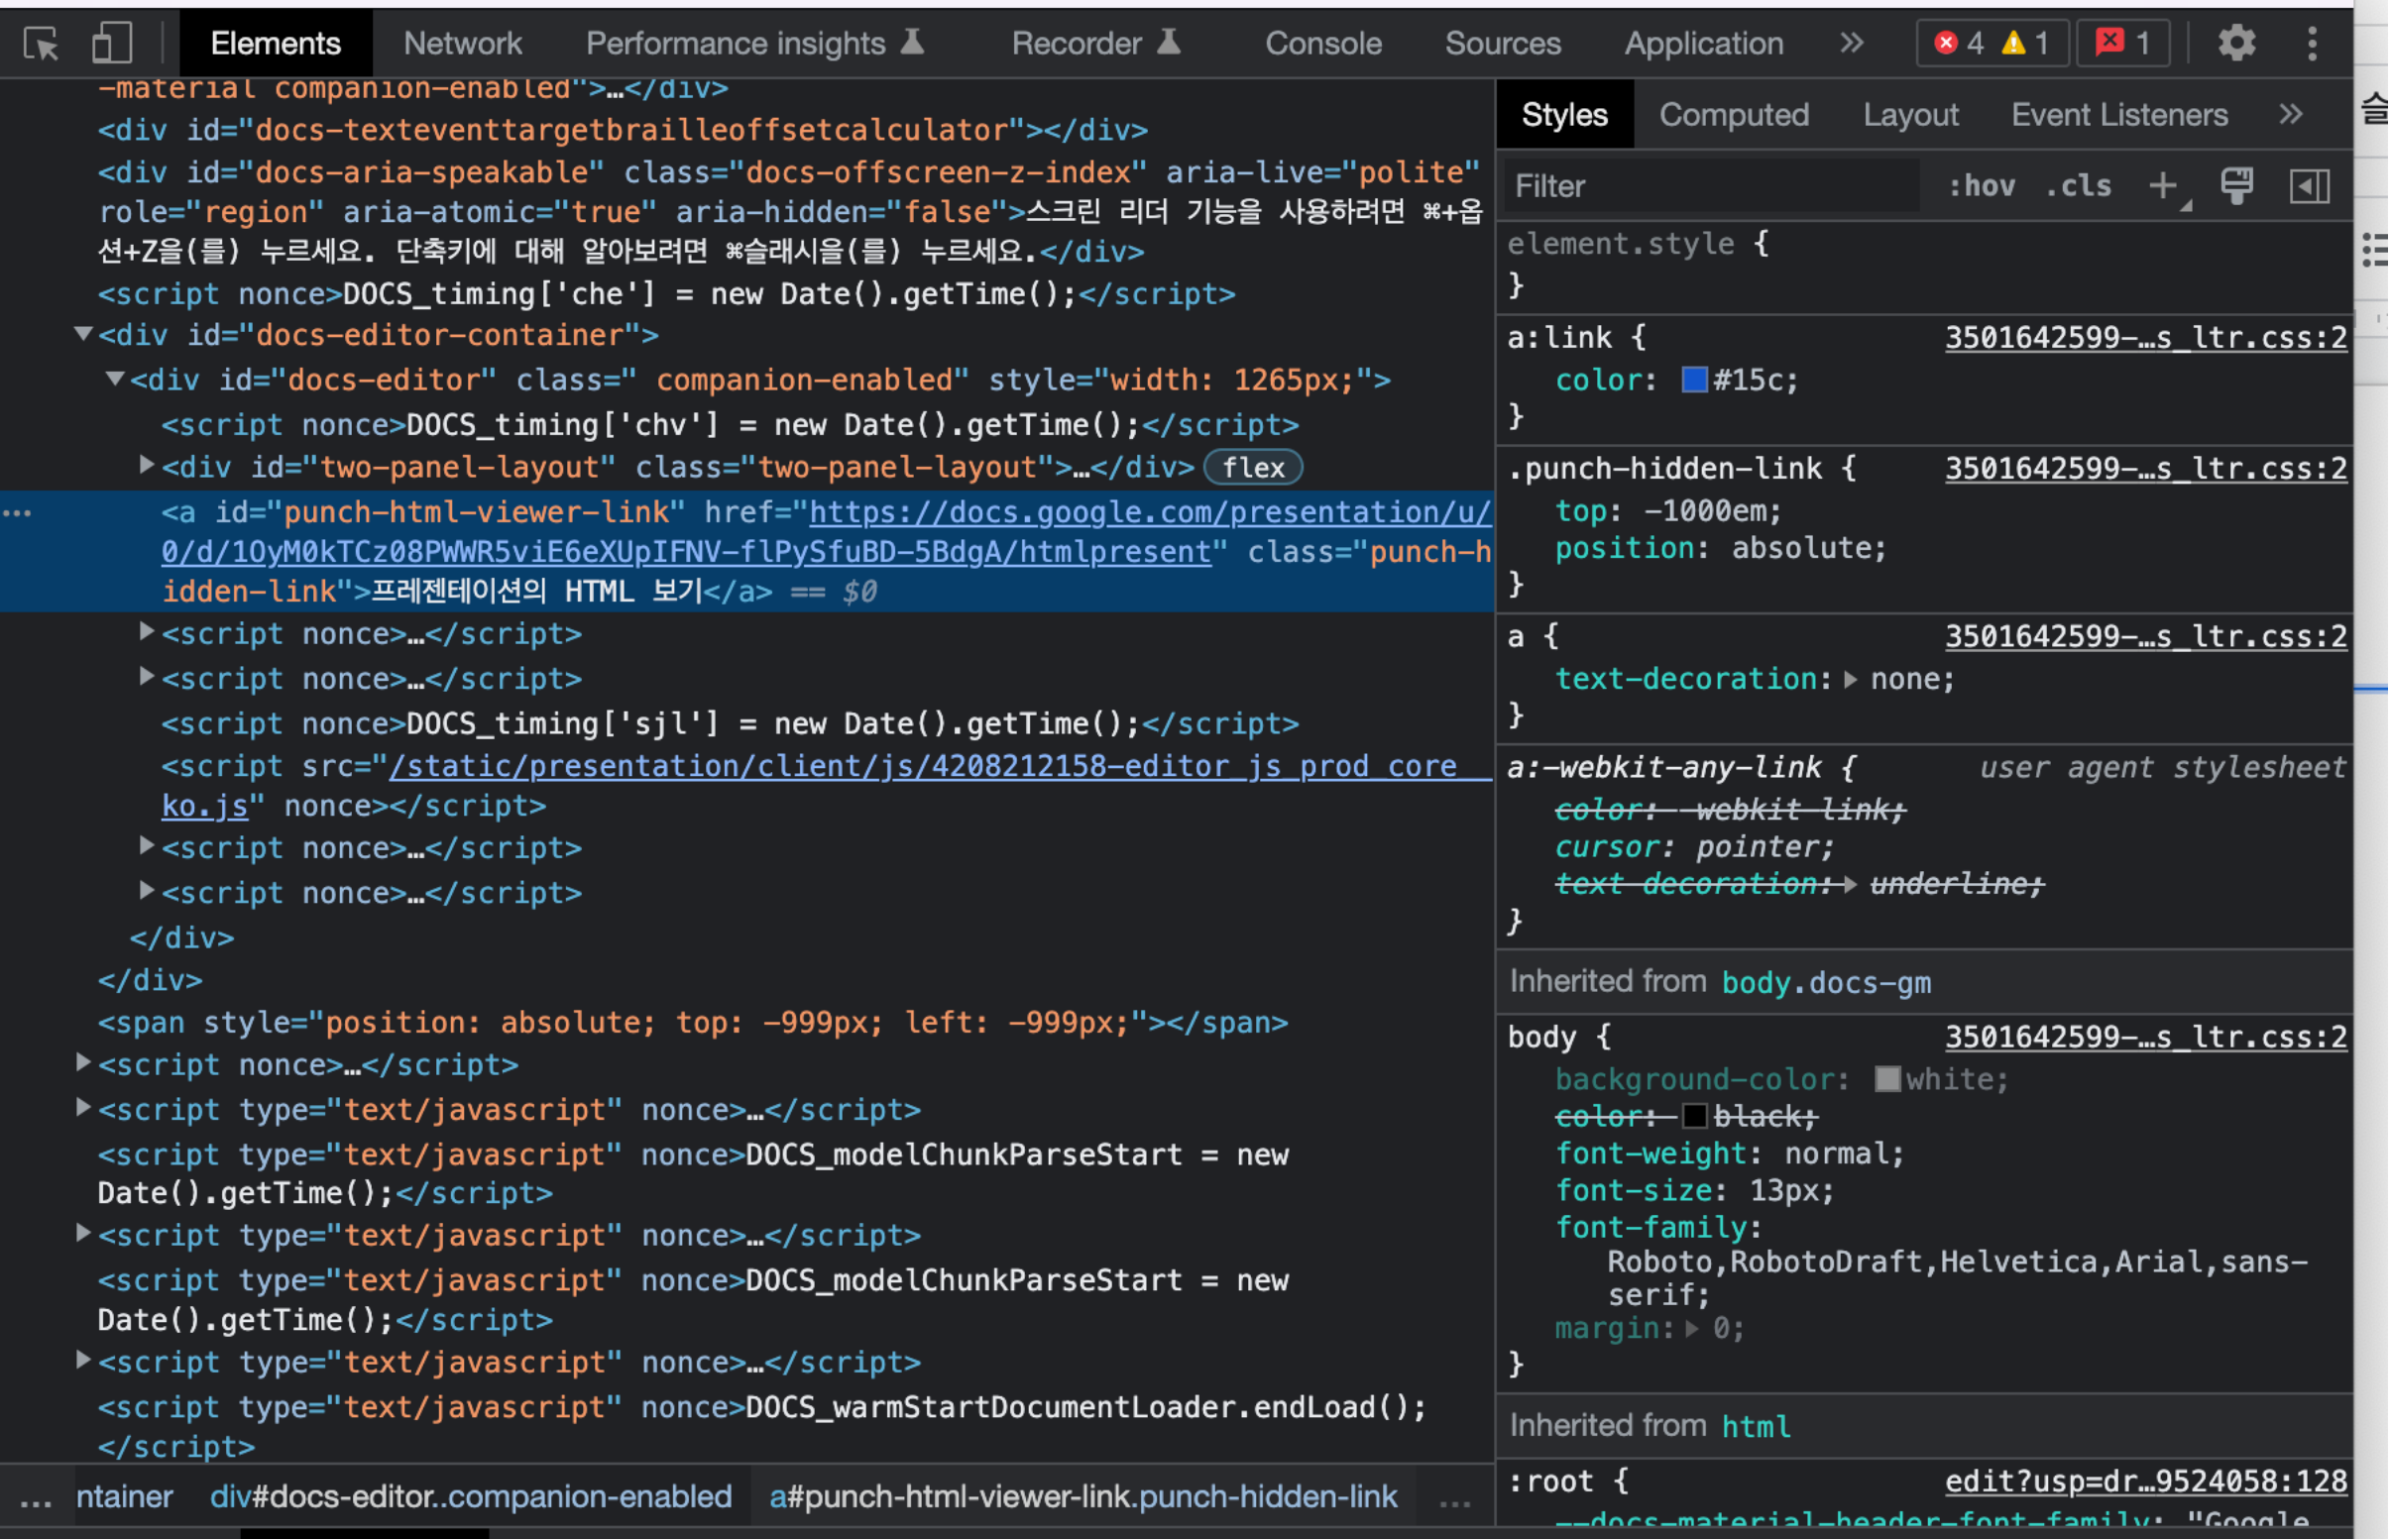

React

Chapter 5

React

Element 생성하기

Element란

Element 구조

```
{  
  type: 'button',  
  props: {  
    className: 'btn-white',  
    children: {  
      type: 'p',  
      props: {  
        children: 'Button'  
      }  
    }  
  }  
}  
  
>>  
<button class='btn-white'>  
  <p> Button </p>  
</button>
```

Element 렌더링

`<div id="root"></div>` - Root DOM node

```
const elem = <p>Hello</p>
```

```
ReactDOM.render(elem, document.getElementById('root'));
```
