

한 번에 끝내는 블록체인 개발 A to Z

Chapter 4

Javascript

Chapter 4

Javascript

JSON

JSON (JavaScript Object Notation)

```
{  
  "employees": [  
    {  
      "name": "Kate",  
      "lastName": "Youn"  
    },  
    {  
      "name": "Brian",  
      "lastName": "Ko"  
    },  
    {  
      "name": "Jun",  
      "lastName": "Kim"  
    }  
  ]  
}
```

① JSON.stringify()

```
const user = {name: "kate", age: 15, gender: 'f'};
```

```
const data = JSON.stringify(user);
```

② JSON.parse()

```
const user = '{"name": "kate", "age": 15, "gender": "f"}';
```

```
const data = JSON.parse(user);
```

③ toJSON()

```
const date = new Date();
```

```
const str = date.toJSON();
```
